

PLANTING CHURCHES | TRAINING NATIONALS

THE STRATEGY

1,000 men each planting 3 churches every 7 years.

Vision 2030 will pour into a church planter for seven years. During that time he will plant three churches with the expectation that at the end of seven years he will be fully supported by his congregations.

This allows us to then direct those resources to another church planter and the cycle will begin again. At the end of the third cycle – in 2030 – we will have 9,000 gospel-centered churches throughout Asia.

Once a planter moves into a self-supported phase of ministry, most of them continue to plant churches. We currently have men in our network who have planted upwards of seven churches. With this strategy we plan to see 10,000 new churches planted by the year 2030.

TRAINING and RESOURCING

At Vision Nationals we place strong emphasis on theological training and education to guard against the heresies prone to creep in during periods of rapid church growth.

Vision 2030 will establish training centers, distribute theological resources and implement aggressive training programs to equip each planter during his seven years with us.

DISCIPLESHIP and ACCOUNTABILITY

Vision 2030 is set up like a network. We focus on districts throughout the state of Andhra Pradesh. Each district has a supervisor who oversees administrative aspects as well as the spiritual growth of the planters within his district.

The planters in each district meet regularly throughout the year to encourage and challenge each other in the ministry.

Once a Vision 2030 planter reaches a self-supported stage of ministry, he is encouraged to continue participating in the discipleship and accountability this network offers.

PARTNER WITH US

Ministry dollars go much farther in Asia than in the west. A rural planter in India can be supported for \$50 a month. Sponsors will receive a photo and biography of the planter they sponsor as well as yearly updates.

There are three phases of sponsorship. At the beginning of a phase, each sponsor can prayerfully consider continuing sponsorship through the next phase.

Phase One – 3 year sponsorship commitment

During the first three years, the planter will complete an intensive training course while simultaneously planting his first church.

Phase Two – 2 year sponsorship commitment

In the next two years, the planter will plant a second church.

Phase Three – 2 year sponsorship commitment

During the final two years, the planter will plant a third church and transition to being a locally supported planter.

**THIS IS AN EPIC TASK.
ONE WE CANNOT ACCOMPLISH ALONE.**

Master's College of Theology

Master's College of Theology is Vision Nationals' fully-accredited seminary located on our campus in India. In addition to planting churches in rural areas around our state, Vision Nationals seeks to plant churches in the heart of Asia's urban centers.

At Master's College of Theology our focus is to train young middle and upper class leaders to reach an educated urban population. Right now we have students at our seminary from India, Thailand, Burma, and Nepal.

With a strong emphasis on practical ministry, each student is required to be actively involved in hands-on ministry while studying with us.

To make this level of education accessible to our students, Vision Nationals subsidizes each student's tuition by \$75 a month.

Every year we see graduated students starting missional, gospel-centered churches in their home countries. Some graduates partner with us - through Vision 2030 - to plant churches in urban centers in Asia.

GET INVOLVED

Talk ▶

You are the greatest resource we have for connecting with others who are passionate about what we do. Spread the word!

Pray ▶

Friend us on Facebook, follow on Twitter, RSS the blog, and sign up for newsletters. Keep informed about what we're doing and pray!

Give ▶

Individually or with a community, partner with us to **resource a church planter starting at \$50 a month, or subsidize a college student's education for \$75 a month.**
